FRIEM Supports Solidarity in Mobility: A New Vehicle for the Misericordia of Segrate

On Monday, December 9th 2024, the Misericordia di Segrate hosted the handover ceremony for a new specially equipped vehicle designed to transport people with mobility challenges.

This initiative is part of the Solidarity in Mobility project, which has involved numerous local companies, including FRIEM, and was born from a collaboration with [Progetti del Cuore](#), a company specializing in fundraising to support social and healthcare organizations.

The [Misericordia of Segrate](#), an association that has been operating for years in the areas of Segrate, Vimodrone, Pioltello, and Rodano, offers essential services such as transportation to hospitals and clinics, delivery of medications, and home delivery of groceries for people with reduced mobility or in vulnerable situations. This new vehicle represents a valuable resource to further improve the quality and efficiency of these services.

"At FRIEM, we strongly believe in the value of social responsibility," said Lorenzo Carnelli, CEO of FRIEM. "We are convinced that companies should play an active role in developing the communities in which they operate." We are proud to support a project that makes a real difference in the lives of so many people. We thank everyone who has contributed to this initiative, which demonstrates how solidarity can truly make a difference.

FRIEM is an Italian technology manufacturer founded in 1950, which specialises in the design and production of electrical converters for special applications. As one of the top global players in the high-power rectifier industry, FRIEM has reached a turnover of over 35 million euros (out of which over 90% of the amount stems from abroad), 1.5 GW of production capacity, while employing over 100 people worldwide.

FRIEM, being a European leader in the green hydrogen production by electrolysis for large power plants, supports the energy transition by assuming a central position in the value chain.

The group consists of the parent company FRIEM S.p.A., with headquarters in Segrate, (Milan) and with subsidiaries in the United States (FRIEM America Ltd), in Brazil, in Chile (FRIEM Chile), Germany (FRIEM Germany) and besides a commercial office in Indonesia. DynAmp, an American producer of high-current DC measurement systems, and the Italian TCE Consultore, specializing in power electronics consulting are also part of FRIEM's group.
